

Eau Claire Kids' Garden Volunteer Description

The Kids' Garden is located in North River Front Park, near downtown Eau Claire. It is staffed by MGVs who plan and implement and two nutritional educators pivotal in educating young children, grades 3-5, about the value of good nutrition.

The children visit the garden four times per week, June-August, and participate in planting, watering and harvesting the various fruits and vegetables. The nutrition educators use this harvest to create snacks, on site, passing on their knowledge and importance of good nutrition. MGVs interested in helping can contact the Extension Office at 715-839-4712.

Sharing your knowledge and love of gardening by demonstrating and helping kids practice is the goal of the Kids' Garden.

Gardening partners sponsoring the Kids' Garden include City Parks and Recreation, Eau Claire County UW-Extension, Longfellow Elementary School and North River Front Neighborhood Association.
